

ONERack patent pending

Installation Guide

Extra power

MNL-1RK-XTRA-PWR v1.10

Tools

- Phillips PH1 crosshead screwdriver
- Pozidriv® PZ2 crosshead screwdriver

In the box

- 1 Voltage selector

- 1 Daisy-chain cable

- 1 Rear dock

- 3 Power connectors

- 2 M3 screws (black)

- 3 M4 screws (silver)

In the unlikely event that a component is missing or damaged, please contact tech.usa@tvone.com or tech.europe@tvone.com

Installing the voltage selector

To avoid damaging your ONERack, build it in a clean, tidy area and protect against electrostatic discharge.

1. Position the voltage selector in the corner of a module so that the tabs sit in the holes.

2. Turn the module over and screw the voltage selector in place with three M4 screws.

Fitting the guide rails and dock

1. Slide the module into the groove in the guide rails.
2. Screw the module in place temporarily with one or two M3 screws.

3. At the rear of the chassis, push the dock into the new voltage selector. Use the module to help you align the dock.
4. Screw the dock in place with two M3 screws.

Selecting the voltage, connecting cables and mounting devices

For further instructions on connecting and mounting devices on the module, see the Installation Guide for ONERack modules (MNL-1RK-MOD). The guide is available from the **Support Documents** tab at www.tvone.com/onerack.
