

USB 1.1 extender up to 150 feet (45 meters) over one CAT-5e cable

EXT-USB-MINI2N

Extends any USB 1.1 device up to 150 feet (45 meters)

The Gefen Mini USB-2 Extender allows the extension of any USB 1.1 device up to 150 feet (45 meters). The Receiver comes with a 2-port USB HUB. This extender exceeds the 16-foot distance limitation of USB extension by using Extreme USB technology to extend USB up to 150 feet (45 meters) away from the computer. This solution is ideal for applications where two USB devices, such as the keyboard and mouse, must be operated remotely but is also useful with most other USB-based devices.

How It Works

Connect the Sender unit to the computer or a USB hub using the included USB cable. Place the Receiver unit up to 150 feet (45 meters) away from the computer. Use a single CAT-5e cable to connect the Sender unit to the Receiver unit. Connect up to two USB devices to the Receiver unit.

Features*

- Extends any USB 1.1 device up to 150 feet (45 meters) using one CAT-5e cable
- Provides support for any full-speed 12 Mb/s or low-speed 1.5Mb/s USB device
- Contains internal USB hub
- Supports Windows XP, Windows Vista, Windows 7, Linux, and Mac OSX
- Requires no external power adapter

Specifications*

- USB Connector (Sender): (1) USB Type B, female
- USB Connector (Receiver): (2) USB Type A, female
- Link Connectors (Sender/Receiver): (1) RJ-45
- USB Current Output: Up to 400mA per USB device (as long as the host can provide 800mA or more)
- Operating Temperature: 0 to +50 °C
- Dimensions (W x H x D) (Sender/Receiver): 3.5" x 0.9" x 2.2" (85mm x 22mm x 55mm)
- Shipping Weight: 1 lb (0.45 kg)
