

T2x Universal Controller

Defining engineering excellence - the remarkable T2x is the fifth generation of RTI's renowned T2 remote control platform. A full complement of hard buttons provide quick, intuitive control, while the 2.8" touchscreen interface can be custom tailored for full control of devices throughout the environment. Now, RTI is taking this design platform to unprecedented levels with cutting edge features that leverage today's technology, providing a more satisfying and reliable control experience than ever before. Innovations include grip sensors to keep the remote awake during use, an accelerometer for instant-on control, an edge to edge touchscreen allows improved gesture control, WiFi® and more. The combination of the T2x and an RTI control system provides the power, the customization, and the advanced features needed to make controlling today's electronics a true pleasure.
