### CAT5E BOOTED UNSHIELDED (UTP) LOW SMOKE ZERO HALOGEN (LSZH) NETWORK PATCH CABLE

LSZH, snagless booted design for network adapters, hubs, switches, routers, DSL/cable modems, patch panels and other network applications.

82430

For fast Ethernet networks that require bandwidth-intensive voice, data, or video distribution applications. Meets all Cat5e TIA/EIA standards, and reduces both impedance and structural return loss (SRL). Each of the individual pairs are bonded together and maintain twist-spacing throughout the line up to the termination point. Made from high quality copper cable, this design minimises Near-End Crosstalk (NEXT) levels with a LSZH outer jacket.

**62.5/125 OM1 DUPLEX MULTIMODE PVC FIBRE OPTIC CABLE (LSZH) – ORANGE**

62.5/125 micron cable for Fast Ethernet, Fibre Channel, ATM and Gigabit Ethernet applications where protection from toxic and corrosive gases is critical

The Low Smoke Zero Halogen (LSZH/LS0H) jacket is composed from materials that lessen the smoke and halogen emissions when the cable is exposed to extreme temperatures. This reduces the amount of harmful toxic and corrosive gases that cabling made with plastic materials would otherwise emit into the air during combustion. This construction makes LSZH cables ideal for use where the protection of people and equipment from harmful corrosive gases is absolutely critical. The patented injection moulding process provides each connection greater durability in resisting pulls, strains and impacts from cabling installs. Each cable is 100% optically inspected and tested for insertion loss before you receive it.
