CORIOgrapher v2

Creative video wall design software for CORIO**master**, CORIO**master** mini & CORIO**master** micro video wall processors
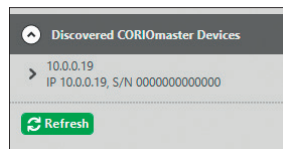

PRISTINE IMAGE QUALITY, NOW WITH 4K

CORIOgrapher **v2** supports 4K resolutions meeting today's demands for pristine image quality and sharpness. Support includes two new modules to the CORIO**master** systems; the HDMI 4K30/60 input module and the HDMI 4K30 scaling output module, both allowing resolutions up to 3840x2160 and are HDMI & HDCP compatible.

Here, a 4K source is displayed on a video wall created using widely available 720p displays with the overall display area matched pixel for pixel with the source.
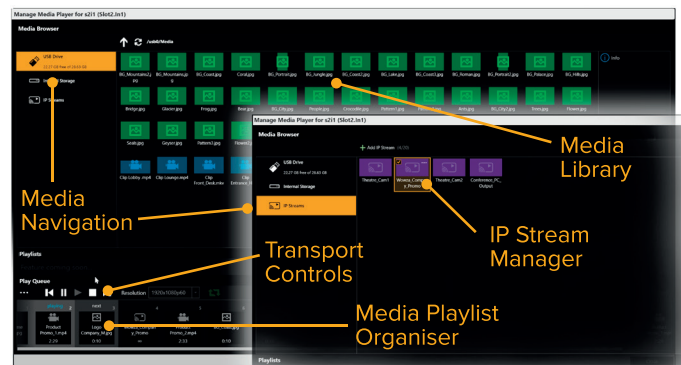

NETWORK FRIENDLY

When the PC with installed **CORIO**grapher **v2** software is connected to a network that contains CORIO**master** devices, it will automatically seek them out and list them as available within the software. **CORIO**grapher **v2** will allow discovery of CORIO**max** devices on multiple networks at any time.

Discovered CORIOmaster Devices

> 10.0.0.19
  IP 10.0.0.19, S/N 0000000000000

🔄 Refresh

Use the Local Area Network to update firmware on all CORIO**master** systems on the network. CORIO**master**'s DHCP capability makes this processes very simple.

EASY CONTROL OF STREAMING VIDEO

With the addition of the Streaming media & 4K playback module, you can now mix streaming video with 4k files and still images into a single playlist all from your CORIO**master**! Simple drag and drop along with expected transport controls makes **CORIO**grapher even more powerful.

MAKE IT PERFECT, EVEN OFFLINE

Save time, build off-line. **CORIO**grapher **v2** software aids in your design process by allowing you to create video wall layouts from a PC without a connection to the CORIO**master**. Once designed, configurations can be uploaded into the CORIO**master** at any time using a direct connection or over the local area network.

tvONE

INSTANT UNDERSTANDING

CORIOgrapher **v2** leads to the industry's design software. Users will find all controls and functions exactly where they expect them, so they can be creating new video walls in minutes.

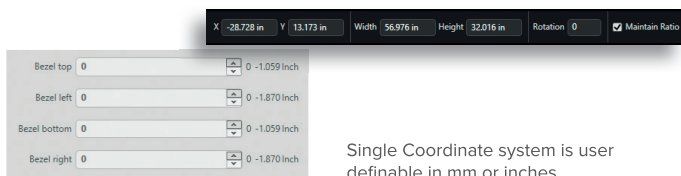

Layer-based video wall creation using industry accepted editing tools for layering, aligning and positioning.

SIZE IT AND STORE IT

CORIOgrapher **v2** software enables you to set the exact dimensions of your displays down to the mm or inch. Mixing of projectors and displays is also easy, as the system provides the ability to account for bezels and spacing between displays. Build a library of displays including resolution for instant recall for future projects.

Single Coordinate system is user definable in mm or inches

PIXEL MODE

Today's LED displays vary significantly in size, pixel density and resolution. To compensate, **CORIO**grapher **v2** features Pixel Mode, enabling exact mapping of the source content to the LED display wall.

RESET, PRESET, IN THE BLINK OF AN EYE

CORIOgrapher **v2**'s Real Time Dashboard provides the ability for instant triggering of saved presets and live routing of sources. Create a full screen or multi-window video wall layout, it doesn't matter. Save it as a preset and it can be recalled anywhere, anytime. Up to fifty presets can be stored and recalled.
